

Integrated Care (Sandwell and Western Birmingham)

To improve the health and Wellbeing
of the People in Sandwell and
Western Birmingham

- A clear link with existing initiatives, such as Sandwell's 2030 Vision.
- To demonstrate a partnership approach in defining our outcomes for our commissioning objectives for 2019/21.
- Working with partners, providers and patients to help shape health outcomes for local people.
- Our work to define Place.
- Prioritising the first 1,000 days and last 1,000 days of life.

Strategic Aims

- To shift the focus of care from secondary to primary and preventative care
- To treat the whole person by integrating physical and mental health approaches
- To bring together health and social care commissioning
- To develop transformation and reduce transactional processes within the health and care system through a strategic approach to the commissioning and delivery of care characterised by a focus on outcomes and experience, long term agreements and a move away from the annual contracting and PBR mechanisms in health
- To focus on the wider determinants of health and wellbeing including housing, employment, education and community safety
- To support the integration of care through the use of common information and data systems and processes
- To support individuals and their carers to live independently and to take responsibility of their own care through the personalisation of health and care wherever possible.
